

## Pro-Line Radiator Stop Leak K

### Description

Pro-Line Radiator Sealant K is a dispersion for sealing leaks in the cooling water circuit systems of passenger cars, commercial vehicles and buses. The product reliably seals hairline cracks and small leaks. Pro-Line Radiator Sealant K can also be used to prevent the need for repair work on the cooling system. The solids dispersion is stabilized in carrier fluid.

### Properties

- suitable for aluminum radiators
- compatible with conventional coolant water refiners and antifreezes
- no negative side effects on the water pump or heating circuit
- permanently and reliably seals hairline cracks and small leaks
- for preventive use

### Technical data

Form	flüssig / liquid
Color / appearance	weiß / white
Density at 20 °C	1,098 g/cm <sup>3</sup>
Viscosity	71 s
Solubility in water	mischbar / mixable
Flash point	104 °C DIN EN 22719 Ethandiol

### Areas of application

Used for sealing small leaks in cooling circuits of passenger motor vehicles, commercial vehicles and buses. Also suited for cooling water circuits equipped with water filters.

### Application

Shake container before use. Start up the heater. With the engine running, pour the contents into the coolant at operating temperature and allow the engine to continue running for at least a further 10 minutes. Contents will treat up to 40 liters of coolant.

### Available pack sizes

250 ml Can sheet metal	5178 D-GB-I-E-P
250 ml Can sheet metal	2294 D-RUS-UA
