

Tornador®

black vs. dirt

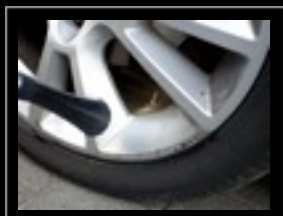

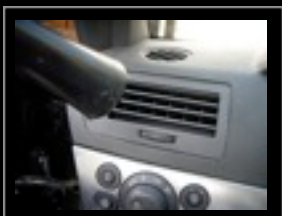

Tornado® **BLACK**

Art.-No.: 601 508

- ✓ double the power
- ✓ low wear and maintenance
- ✓ lower air consumption
- ✓ suitable for 240V compressors
- ✓ lower noise emissions

The professional cleaning pistol for cars, trucks, buses, taxis and commercial vehicles. With this powerful pulse cleaning technology, you can either wet or dry-clean surfaces efficiently with a neutral cleaning agent and save energy at the same time.

Our technicians have been able to increase the power of the world famous Tornado®-Gun Z-010 even further. The result: the Tornado® **BLACK**. Equipped with sealed ball bearings inside the rotation set, the Tornado® **BLACK** is also able to work with small or mobile compressors (see box on the left), because the full potential power is available at pressures as low as 4.5 bar. Wear has also been minimised, because the rotation set no longer comes into contact with the nozzle (outlet cone).

With the development of the Tornado® **BLACK** it is now possible to produce enormous power, even with a very small compressor. All that is required is a compressor with a discharge rate of at least 270 l per minute.

This can be achieved using compressors with a reservoir of as little as 50 l capacity, so that it is ideally suited for mobile use.

Because of this it is now possible to visit your customers on site without a great deal of inconvenience.

The newly developed rotational technology of the Tornado® **BLACK** saves both time, money and stress for users, because our technicians have succeeded in reducing noise levels in spite of increasing the power. Of course, for professional users, this also means that you can attend to more customers in a shorter time.

The development into a rotation set with ball bearings make the Tornado® **BLACK** the most powerful cleaning device in the Tornado® family, which also includes the following devices:

- Z-010 Tornado®-Gun
- Z-011 Foam-Gun
- Z-012 Suction cleaner
- Z-014 Dry cleaning pistol
- Z-017 Tornado® XL Suction cleaner
- Tornado® Towel drying cloth
- Tornado® Microfibre cloth
- Car cleaning brush

Brilliant results

Absorb surplus liquid immediately with the new Tornado® Towel drying cloth. It absorbs 50% more water three times faster than conventional window cleaning cloths. The Tornado® Towel dries without leaving streaks or lint. The perfect accessory.

The Tornador® Towel drying cloth is specially designed to absorb large quantities of liquid and is vastly superior to conventional window cleaning cloths. It absorbs up to 50% more water three times as fast.

With a size of 66 x 30 cm this is specially aimed at professional car valeting companies. In this trade, time is money and this is saved simply by not having to wring out the cloth so often. The cloth offers smear and lint-free drying and is of course machine-washable at up to 30°C.

It has long been common for professional methods to be used in private households. With the introduction of the second cloth size of 43 x 32 cm, we also cater for these customers.

In addition to the Tornador® Towel drying cloth, the cleaning range also includes:

Z-010 Tornador®-Gun
Z-011 Foam-Gun
Z-012 Suction cleaner
Z-014 Dry cleaning pistol
Z-017 Tornador® XL Suction cleaner
Z-020 Tornador® **BLACK**
Tornador® Microfibre cloth
Car cleaning brush

Tornador® Towel

Art.-No.: 877 900

- ✓ extremely high absorption
- ✓ 50% greater liquid uptake
- ✓ three times faster liquid uptake
- ✓ cleans without smears or lint
- ✓ resistant to oil and grease

The newly developed Tornador® Towel drying cloth is extremely absorbent. It absorbs 50% more water three times faster than conventional window cleaning cloths. The Tornador® Towel is machine washable up to 30°C and is resistant to most oils, greases and chemicals. Specially developed to gently dry all sensitive surfaces. Dries without smears or lint.

The new Tornador® Towel drying cloth is the perfect accessory for work with the Tornador®-Gun Z-010 or the Tornador® **BLACK** Z-020. Completely absorb the liquid with this cloth. Guaranteed brilliant results thanks to smear and lint free drying.

A perfect team

All articles from the Tornador® -"family" are perfectly matched, and ideally complement each other to give brilliant car care results.

Tornador® Micro

Art.-No.: 877 893

Thick microfibre cloth

Size: 40 x 40 cm

With 20,000 metres of fibre in only 1 cm² the cloth absorbs up to 730% of its own weight.

The cloth can be washed 100x at 95° C and 1000x at 60° C.

Ideal when preparing for painting, degreasing, dusting and polishing. Tiny microfibres absorb all the dirt. No cleaning additives are necessary.

Car-cleaning-brush

Art.-No.: 877 910

Professional car cleaning brush

Size: 40 x 255 mm

Brush head circumference: 30 mm

Originally developed as a washing brush, this brush can now be used for dusting and cleaning poorly accessible areas on and in the car.

Thanks to the unique production method, this is an excellent quality and exceptionally durable product.

Acid-resistant bristles make it very popular as a wheel rim brush for professional car valeting companies.
